Actrol's **Solutions Card** is an individual authorisation transaction card for making purchasing on your businesses behalf. Its distribution is strictly controlled by you. The card is linked to a specific account nominated by you ensuring the correct account is always used and is linked to your specific price discounts. The Actrol Solutions Card also identifies each card holder separately and allows for individual reporting of your purchases. In short it offers security, account accuracy, and individual reporting on demand.

solutionscard™

Your purchasing solution

Now you have the control and reporting mechanism for all your Actrol purchases in one simple card. It will deliver your company a consistent form of authorisation for all your purchases in a clear and precise manner that you control. Each individual Actrol Solution Card is instantly recognised and accepted at any Actrol branch nationwide and allows you to nominate which account should be used, it couldn't be easier.

Your reporting solution

Solutions Card use enables Actrol to report on each individual's purchases. Knowing more detail lets you track and easily match purchases with jobs. Importantly the card holders detail is attached to every invoice so you have even more information at hand. Specific invoices, refrigerant purchases or cylinder rental can easily be viewed, printed or downloaded via the internet when using Actrol's Solutions Online reporting system. Use of the Actrol Solution's cards further enables this data to be broken down to each card user. A summary or full details of all recent purchases are also available for you to view at anytime through Actrol's secure Solutions Online. No more waiting for monthly reports to be sent, it's now available for you to view at any time.

Your security solution

Each Actrol Solutions Card is generated specifically for each staff member at your request. They are delivered to you to ensure you control the distribution. The card authorises which staff are able to purchase on your companies behalf and acts as a form of security to help prevent fraudulent transactions. Up to date detail of card holders is available through Actrol's Solutions Online. This secure online service also allows you to add, modify or delete card holders at anytime. Your specified account is then used when a current Solutions Card is presented at an Actrol branch.

Your accuracy solution

Having multiple accounts is common. Many companies use this to separate purchases for service work from projects or construction jobs. Each Solutions Card points to your preferred account specific for that card and its user. Controlling which account each Solutions Card is attached to will help you direct which accounts are used and by who. This gives greater accuracy when reviewing your purchases and billing your customers.

Your control solution

Controlling who has authority to purchase for your company needs to be in your hands. Actrol's Solutions Cards are only issued from your request which you make in Actrol's Solutions Online. Importantly, you can suspend or delete users online as well. You can alter account details or even transfer the card to another employee. With complete up to date detail of all of your Solutions Cards, Actrol's Solutions Online is the perfect avenue to ensure you are in control of who has authority to purchase on your behalf.
