

SUPERNOVA

DV-40 DIGITAL MICRON GAUGE

PROGRAMMABLE ALARM

12 month warranty

JB Industries is proud to introduce our award winning "SUPERNOVA" micron gauge. The unit allows a service technician to be certain when a system is properly evacuated of air and moisture before charging with refrigerant. The SUPERNOVA is accurate from 12,000 microns down to 10 microns. The unit features many user-defined programmable options such as duration of the backlight, programmed shut-off, ability to set alarms when system reaches defined mark. The service technician can customize the SUPERNOVA to fit work habits. Make service calls more efficient without sacrificing quality. The SUPERNOVA has been named a Bronze winner for the 2009 Dealer Design in tools.

Brass fitting on lengthy flexible chord for hard to reach places

Programmable alarm allows you to perform other tasks

Factory calibrated and requires no additional calibration

Measures in microns, PSI, InHg, Pascal, Torr, mTorr, and mBar

If sensor gets contaminated clean with simple alcohol

Programmable shut-off

Large, easy to read LCD screen

Backlight is programmable for duration

JUST BETTER
