Sauermann

SI30 & SI33

The Sauermann SI30 & SI33 pumps are specifically designed to be installed on:

• Wall mounted units

- Fan coil unit
- Ceiling suspended units
- Ducted units

These pumps are a two piece kit with the pump and float detection sensor interconnected via the click fit sensor cable and suitable drain hose, depending on the installation requirements.

Features

- 90°C Thermal protection
- 20dBA at 1m SI30

Delta Pack

The Sauermann Delta Pack is a convenient complete ready to install 'quick fit kit' for wall mounted units. The pump is mounted on a anti-vibration bracket inside the trunking elbow, inline with the drain reservoir. Suitable for either side of the unit. The kit comes with pump & integrated detection, anti-vibrating reversible mounting bracket, electrical quick mount power cable, 15mm connecting rubber drain hose, trunking and rubber joint.

Features

SI1082

The Sauermann SI1082 is a monobloc pump with integrated float detection. The pump is mounted onto the included anti-vibration reversible fastening bracket which can be located inside most brands of trunking and is designed to be installed on:

Wall split systems

- Floor mounted units
- Ceiling suspended units
- Ducted units

• Fan coil units

Pump also comes with quick fit electrical power cable, 15mm & 35mm rubber inlet connecting drain hose and a 4mm vent tube.

Mini Condensate Pumps

Aspen

Mini & Maxi Orange

The Aspen Mini Orange & Maxi Orange pumps are designed to be installed:

- Above the false ceiling where possible
- Behind wall mounted evaporators

• In plastic conduit

Connecting the drain hose to the reservoir and placing the pump drive unit within the evaporator, condensate water can be pumped away to a suitable drain. Within the Orange kit there are two reservoirs to choose from, which must sit flat and horizontal. One allows you to connect directly to the drain hose of the evaporator and the second reservoir can be placed directly into a condensate tray.

Mini & Maxi Lime

The Aspen Mini Lime & Maxi Lime pumps are completely unique, in both their design and installation advantages. The pumps are clipped directly onto the reservoir so there is minimal suction lift. By connecting the drain hose to the reservoir of the pump unit, condensate water can be pumped away to a suitable drain. The pumps fit securely into a specifically designed elbow that holds them horizontally to ensure reliable operation. The pump and elbow are reversible therefore they can be installed easily on either side of an evaporator unit.

Mini Blanc

Designed to be fitted below the indoor unit, the Mini Blanc offers an extremely easy to install mini pump for all wall and ceiling suspended indoor units. Suitable for both commercial and domestic installations, the quick fit pump is simply screwed to the wall. It is easy to access therefore low maintenance. The Mini Blanc is ultra quiet in operation as well as discreet, with a slim profile of 55mm from the wall.

Mini Agua

The Mini Aqua has been designed to give the installation flexibility, where the latest generation of A/C units are becoming even smaller.

The Mini Aqua is designed to be installed:

• Within wall mounted evaporators

• In plastic conduit

By connecting the drain hose to the reservoir and placing the pump drive unit within the evaporator or conduit, condensate water can be pumped to a height of 8 metres. Using the proven functionality of Aspen's other mini pumps, the Mini Aqua is also incredibly slim in size. Measuring only 28mm in height and 28mm in depth, it is one of the smallest condensate pumps in the world.

BlueDiamond

Blue Diamond

The Blue Diamond is a heavy duty rotary diaphragm condensate pump. The rubber construction of the rotary diaphragm copes with sludge, slime, grit and even running dry. The pump is whisper quiet and yet has high flow rates. The pump comes complete with a reservoir sensor. This pump is ideal for larger and/or problematic installations.

Features

- Self priming
- Ultra reliable
- Reduced service costs
- Slimline
- Blue Diamond has the performance to overcome installation difficulties just plug and play, fit and forget.
- Kit with in & out tubing & connections, anti vibration feet & mountings, integral volt free alarm module & 3 core power cord (2m)
- Connect the drip tray to the pump reservoir. The hi-low solid state level sensors automatically switch the pump on/off to remove the condensate.
- The alarm shuts off the A/C in fault mode and restarts the A/C when the condensate has cleared.

EC-400 Condensate Pump

Removes condensate from wall or ceiling mounted air conditioners. The EC-400 consists of three components: control unit, detection reservoir and pump. All three components can be placed inside the air handler, or any of the three can be placed outside the air handler. The pump and control unit can be placed up to one metre above the air handler. A three position float detection system assures reliable On, Off and Safety Alarm functions. The EC-400 is suitable for use with split air conditioners up to 10 kW.

Gobi

The Gobi is a condensate discharge module designed to be fitted below modern wall mounted air conditioners.

Features

- Electronic Energy Control System (EECS) with alarm circuit
- Quick, simple trouble free installation
- Thermal protection
- Built-in non-return valves
- CE and UL marked

- Soft start with EECS
- Aesthetic design blends in naturally into its surroundings
- Amazingly guiet
- Fits all high-wall-mount air conditioners

PE5200

The Sauermann PE5200 pump is suitable for units up to 8kW. Specifically designed for the following:

- Wall mounted air conditioners
- Ceiling mounted units
- Ducted air conditioning units

This model is a compact in size and operates via a float detector. It features a high 12m discharge head height and is very quiet in operation. It is IP65 rated. It offers a high level NC alarm contact. Replacement tubes and heads make maintenance/replacement easy (no need to re-wire the base unit – simple fit and clip in the new motor) Supplied with an easy fix wall bracket.

Peristaltic Pumps

Aspen

Universal Peristaltic

The Universal peristaltic pump operates with two temperature sensors. These allow the pump to detect and be triggered by a change in air temperature, making this pump suitable for many applications.

The Universal is designed to fit in ceiling voids and lift the condensate water from wall mounted machines where a gravity drain is too obtrusive. It can also be used on cassettes fitted with an internal lift pump. The pump can be mounted remotely as it is self-priming to a height of 3 metres and will pump 6.25 litres of water per hour against a maximum head of 12 metres. The pump runs constantly while the air conditioning system is cooling - when the cooling switches off a 3 minute timer ensures that the condensate tray is emptied before the pump switches off.

The Universal pump is a peristaltic rotary type - which means that it is quiet in operation, very reliable and will run dry without fear of damage or embarrassing noise. Unlike other pumps using either mechanical or electrical conductivity sensors, the Universal does not suffer from corrosion or contamination problems.

Features

- Senses 5C differential across the evaporating coil
- 12 metres discharge head
- No loud sound from dry running
- Pumps water, fibrously contaminated water and air
 Push-in plug
- Operates only on cooling
- 3 minute timer overrun
- Manual test switch
- Self-priming lifts 3 metres
- No siphoning back
- Fire retardant plastics
- Wall-mounted bracket

• Connecting cable: 3 metres

• Only requires live/neutral supply and 2 sensors either side of the evaporating coil – one 'air on' and one 'air off'

- Refrigerated display cabinets
- Cold store cabinets
- Dehumidifiers

• Ducted units

- Multi cassette unit
- Column air conditioning units

• Gas condensing boilers

This model is a single piece 2 litre tank unit, and is built to last. It has high performance and tolerates charged, high temperature and mildly acidic condensates from refrigeration and air conditioning systems. Can be floor mounted attached to a wall or hung from a ceiling. Easily removable tank and reversible pump, for left or right entry with a quick fit electrical cable.

- Oil condensing boilers
- Refrigerated display cabinets
- Multi cassette unit

- Gas condensing boilers
- Cold store cabinets
- Column air conditioning units
- Gas furnaces
- Evaporators

This model is a single piece 0.5 litre tank unit, which can be installed internally or externally to the system. It is a semi submersible design and has a waterproof rating of IPX4. It also has a low sound level and is compact in size.

EBM Papst

EBM-Papst have taken their proven ebm 40 JB pump design and improved it significantly. The powerful split-capacitor motor with high starting torque supports easy starts even after long off-periods. It is protected and self-cooling for longer lifetime. The improved design gives increased performance while using 20% less energy than the comparable evap pumps in the market. It replaces most other pumps on the market and its single point mounting enables quick exchange.

Features

- Reliable external rotor motor
- Performance improved by 20%
- 2 year warranty

- Efficient up to 20% less energy use
- Easy replacement of most evap pumps on the market
- Exclusive proven design for harsh Australian conditions

• Low draft - requires minimum of only 57mm water depth

Sump Dump

With the Sump Dump drainage system, evaporative coolers can now be operated with a hydraulically operated valve ensuring reliable closing and draining in one movement.

As an active part of the cooler, incorporating only one solenoid for both water isolation and drainage, the Sump Dump™ System ensures that:

- The unit is completely dry and clean when not in use The pads remain clean and odour free
- No residual water means no corrosion
- The absence of stagnant water means no algal build-up

Kits

Kit Contents

- Complete retrofit dump valve unit
- 24V solenoid
- 300mm SWC PVC drain adapter with O-ring
- 6mm water supply tube from solenoid to valve
- 240V to 24V encapsulated transformer with 2 metre lead

Little Giant

Submersible Pumps

Small submersible epoxy encapsulated pumps for commercial, industrial and home use. Applications include statuary fountains, water displays, air conditioners, machine tool coolants, and many other applications where liquid must be transferred or recirculated.

Features

- Continuous operation
- Can be installed on any of five sides
- Sump type pick-up • Removable inlet screen
- Epoxy encapsulated motor • Operates fully submerged

- Motor overload protection on PE-2
- Filled with special oil that provides lifetime lubrication & rapid dissipation of heat through housing

Refco

Anti-Vibration Pads

Refco's AVP Pads are the latest generation in vibration dampening technology. AVP pads outperform cork or solid rubber pads by a margin greater than 3:1. This enhanced performance is due to the special composite foam centre. The rubber plates on top and on the bottom have opposing ribs to prevent the pad from moving under the vibrating machinery. The AVP pad is also much more durable than for example cork as the AVP is not affected by oils, chemicals or humidity.
